Intellectual Property

For more than 35 years, DOAR has helped prominent attorneys navigate matters involving complex technical issues, valuable IP, and licensing conflicts spanning a broad range of industries. Across federal courts, the ITC, and other venues, we help trial teams make complex issues clear, persuasive, and connected to the broader story of the case.

TESTIFYING EXPERTS

DOAR represents leading testifying experts across advanced technologies and life sciences, including AI, cryptocurrency, and pharmaceuticals. Our experts include academics, industry executives, and former regulators who provide clear, well-supported analysis on the issues that shape IP disputes.

JURY CONSULTING

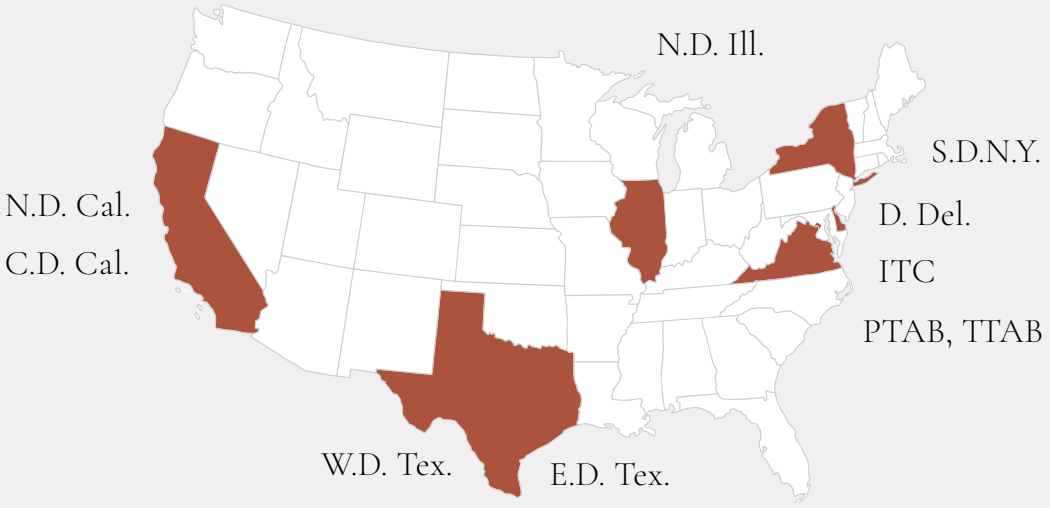

IP cases often require jurors to evaluate complex technology alongside questions of innovation, ownership, and value. Through focus groups, mock trials, and large-sample research, DOAR tests themes, arguments, witnesses, and visuals to identify what resonates and what may create confusion. These insights help counsel refine trial strategy, prepare witnesses, and develop jury selection approaches grounded in how decision-makers are likely to view the dispute.

TRIAL CONSULTING

Effective IP advocacy requires clear teaching at every stage of the case. DOAR works with trial teams to structure technical tutorials, Markman presentations, witness examinations, demonstratives, animations, timelines, and evidence displays that make complex issues accessible without oversimplifying them. Our consultants help counsel present technical and economic evidence with clarity, precision, and persuasive force.

EXPERIENCE ACROSS IP VENUES & FORUMS
