International Trade Commission

At DOAR, we bring deep expertise and strategic insight to matters before the International Trade Commission. We have decades of experience working with attorneys in Section 337 investigations, which gives us meaningful insight into the evolving dynamics of the forum, including procedural patterns and adjudicative approaches that shape how investigations unfold. That perspective, combined with our disciplined execution, makes DOAR a trusted source for leading testifying experts, graphics consulting and design, and evidence presentation support in ITC matters.

TESTIFYING EXPERTS

DOAR affiliates with technical experts whose academic, engineering, and industry experience enable them to evaluate complex technologies and present clear, defensible opinions. Their expertise spans semiconductors, wireless communications, medical devices, pharmaceuticals, and other advanced technologies.

GRAPHICS CONSULTING

DOAR develops graphics and demonstratives that translate complex technical, legal, and factual material into clear, visually focused presentations. Each visual is designed to reinforce key issues and support a disciplined presentation of the record.

EVIDENCE PRESENTATION

DOAR works with counsel to manage the presentation of evidence so exhibits, demonstratives, and testimony are delivered clearly and consistently. From preparation through hearing execution, we maintain control and focus on the substance of the case.

SOME ITC INVESTIGATIONS SUPPORTED BY DOAR

- Certain Video Capable Electronic Devices, Including Computers, Streaming Devices, Televisions, Cameras, and Components Thereof
- Certain Semiconductor Devices and Mobile Devices Containing the Same
- Certain Cellular Base Station Communication Equipment and Components Thereof
- Certain Photovoltaic Trunk Bus Cable Assemblies and Components Thereof
- Certain Cochlear Implant Systems and Components Thereof
- Certain Botulinum Toxin Products and Products Containing Same
- Certain Antibody Drug Conjugates and Products Containing the Same
- Certain Chemical Mechanical Planarization Slurries and Components Thereof
- Certain Automated Storage and Retrieval Systems and Associated Control Software
- Certain Vehicle Control Systems, Vehicles Containing the Same, and Components Thereof
- Certain Smart Thermostat Systems / Smart HVAC Systems and Components Thereof
- Certain Vaporizer Devices and Components Thereof
